#### KELLY'S BULK GARDEN SEED

With the resurgence in home gardening, Kelly's bulk seed has become more popular than ever. Bulk seed is just a fraction of the price of packaged seed, and Kelly's has a large selection from which to choose. Many varieties are also heirloom and ALL our garden seed is Non-GMO.

#### KELLY'S ATHLETIC MIXTURE

This is our most popular turf grass mixture because it can be used almost anywhere! It tolerates both sun and shade and it has a root system that goes down about 12 inches, making it extremely drought tolerant!

### THE SEEDY SIDE

In a move that is hoped will rehabilitate a century-old, iconic Peoria building and help reinvigorate downtown development, Caterpillar Inc. and OSF HealthCare are partnering to develop the property at 124 SW Adams Street (commonly known as the former Chase building) into OSF HealthCare's new Ministry headquarters. In addition to the Chase building, Caterpillar is donating the Peoria Professional Building, the adjacent parking lot and \$3 million to OSF HealthCare for further development of amenities on the block. (OSF Newsroom)

At Kelly's we couldn't be more excited for this announcement that is supposed to bring over 700 employees to the downtown and hopefully spur on other businesses to make downtown Peoria their home. Many things have been happening downtown including the development of the warehouse district which is home to new businesses, restaurants, and places to live. Downtown Peoria is well on its way to creating a place where you can Live, Work, and Play!! And after 113 years in downtown Peoria, that makes us very happy!!

Kelly's is still your "go to" place for small seeds. Whether it's alfalfas, clovers, pasture mixes, waterway mixes, lawn mixes, food plot mixes, pollinator mixes, or bulk garden seed, Kelly's has the seeds you need for every application.

Quality has and always will be our only consideration when it comes to procuring seed. Order today and buy with confidence!!

## COVER CROPS

Cover Crops provide species and mixes that improve soil tilth, increase crop yields, break disease and pest cycles, reduce soil erosion, increase water infiltration, and recycle valuable nutrients.

**ECO-TILL RADISH** has an extra-large root system that allows it to pull nitrogen and other nutrients from deep within the soil and bring them back to the surface. Upon decomposition, the N and other nutrients become available to the next crop. **ECO-TILL** radish reduces soil compaction, increases soil organic matter, improves soil tilth and also enhances soil aeration. **6-10 lbs./Acre**

**FRIA ANNUAL RYEGRASS** is a late maturing, widely adapted diploid annual ryegrass with exceptional cold tolerance. Other benefits include improved disease resistance to crown rust, gray leaf spots, and helminthosporium leaf spot. **FRIA** provides excellent root penetration and erosion control. **15-20 lbs./Acre**
