At Kelly Seed Co., we are proud to have served the Central Illinois area for over 115 years. Kelly Seed was founded by W.G. Kelly in 1905. Harold Church, our family's patriarch, started working for W.G. Kelly in 1936 and soon after bought the business where he and his wife Helen worked for over 70 years. Today, son Stephen Church, daughter Nancee Vespa, and grandsons Nick Vespa and Matthew Church continue the family tradition. Kelly Seed has evolved and expanded to meet the changing needs of its customers while remaining true to its "old time" flavor. Customers come from miles around, relying on the experienced staff for our extensive knowledge, friendly service and the individualized attention that is sometimes lost in the hustle and bustle of today. We, at Kelly's would like to thank our valued customers who have placed their trust in us for all these years!

## COVER CROPS

Cover Crops provide species and mixes that improve soil tilth, increase crop yields, break disease and pest cycles, reduce soil erosion, increase water infiltration, and recycle valuable nutrients.

**ECO-TILL RADISH** has an extra-large root system that allows it to pull nitrogen and other nutrients from deep within the soil and bring them back to the surface. Upon decomposition, the N and other nutrients become available to the next crop. **ECO-TILL** radish reduces soil compaction, increases soil organic matter, improves soil tilth and also enhances soil aeration. **6-10 lbs./Acre**

**FRIA ANNUAL RYEGRASS** is a late maturing, widely adapted diploid annual ryegrass with exceptional cold tolerance. Other benefits include improved disease resistance to crown rust, gray leaf spots, and helminthosporium leaf spot. **FRIA** provides excellent root penetration and erosion control. **15-20 lbs./Acre**
