KELLY'S BULK GARDEN SEED

With the resurgence in home gardening, Kelly's bulk seed has become more popular than ever. Bulk seed is just a fraction of the price of packaged seed, and Kelly's has a large selection from which to choose. Many varieties are also heirloom and ALL our garden seed is Non-GMO.

KELLY'S ATHLETIC MIXTURE

This is our most popular turf grass mixture because it can be used almost anywhere! It tolerates both sun and shade and it has a root system that can grow more than 18 inches, making it extremely drought tolerant!

All of us at Kelly Seed Co. would like to thank you, our customers for your continued business for the past year and the year to come! 2021 was a very challenging year. Every aspect of our business was disrupted due to supply chain issues. Many products were hard to obtain and the cost to get them was higher as well. Increased costs in raw materials, fuel, and the lack of work force were definitely contributing factors.

2022 also looks like it will be challenging as well. The seed industry was greatly impacted last year due to adverse weather conditions that impacted both the growing season and the harvest of seed. Certain grasses and clovers are in short supply creating shortages and higher cost.

At Kelly's, we have worked hard to procure seed to anticipate the needs our customers. We have many loads of seed in stock and many more on the way. We encourage you to think about what seed you will need to make your operation successful and order early.

COVER CROPS

Cover Crops provide species and mixes that improve soil tilth, increase crop yields, break disease and pest cycles, reduce soil erosion, increase water infiltration, and recycle valuable nutrients.

ECO-TILL RADISH has an extra-large root system that allows it to pull nitrogen and other nutrients from deep within the soil and bring them back to the surface. Upon decomposition, the N and other nutrients become available to the next crop. **ECO-TILL** radish reduces soil compaction, increases soil organic matter, improves soil tilth and also enhances soil aeration. **6-10 lbs./Acre**

FRIA ANNUAL RYEGRASS is a late maturing, widely adapted diploid annual ryegrass with exceptional cold tolerance. Other benefits include improved disease resistance to crown rust, gray leaf spots, and helminthosporium leaf spot. **FRIA** provides excellent root penetration and erosion control. **15-20 lbs./Acre**
