KELLY'S BULK GARDEN SEED

With the resurgence in home gardening, Kelly's bulk seed has become more popular than ever. Bulk seed is just a fraction of the price of packaged seed, and Kelly's has a large selection from which to choose. Many varieties are also heirloom and ALL our garden seed is Non-GMO.

Good news in the turf and forage grass industry. Seed prices have come down due to a better supply of seed. Global inflation has led to a decrease in demand for seed because of a softening in construction projects. Also, the weather out in the growing areas was not ideal, but the crop was still good, creating a relatively good supply to meet demand.

Clover prices have trended higher due to poor weather conditions throughout the growing season in the Pacific Northwest, New Zealand and Australia. Our recommendation is to buy early to ensure you have clover for all your seeding projects. When comparing price, check to see if the seed is coated or raw. The price will differ considerably between the two.

As always, we thank you for your continued business and look forward to serving you this year!

Quality has always been our first consideration in the procurement of seed. Buy with confidence!
